

**CERTIFICATE,
BROADBAND HFC NETWORKS
TECHNICIAN
2007-2008**

Technological advances have evolved and transformed the traditional cable network from one of coaxial cables and amplifiers to one that includes significant amounts of fiber optics. The need for efficiency and reliability in the network has made it necessary for the typical cable network technician to have skills in RF and optical technologies. This certificate ensures that the student is expert in HFC network maintenance practices and procedures and is qualified to serve and maintain two-way analog and digital services in the coaxial feeder and trunk system, fiber-optic system and head-end.
