

**6 Credits**

The Construction Estimating program introduces students to residential and commercial print reading, covering the interpretation and reading of construction prints and related documents as used within the building trades industry. This certificate also covers basic construction estimating. Students will develop skills in estimating the amount and cost of various constructions and will demonstrate these skills by making estimates of materials and labor quantities and the cost of representative types of construction. This mini certificate requires only two courses to complete the certificate.

Financial Aid is only available for the coursework in these certificates as part of the ultimate educational goal of obtaining an A.A.S. degree as indicated on your College application. Please visit the Financial Aid Office for more details.
