

As our digital reliance grows, the need for computer technology professionals increases. This degree combines skills in computer programming, software assurance, and database development fundamentals. A degree in Secure Software Development prepares students for jobs as Computer Systems Analysts, Software Quality Assurance Engineers and Testers, Computer Programmers, Software Developers, and Information Security Analysts.

The AAS Secure Software Development Degree will be offered at both ACC's Sturm Collaboration Campus in Castle Rock and Littleton Campus. ACC has a transfer articulation with CSU Pueblo, under which students are guaranteed a junior standing with no more than 62 credits to meet the graduation requirements for a B.S. in Computer Information Systems-Software Development Concentration issued by CSU-Pueblo. This B.S. can be attained through a blend of in-person classes at the Sturm Collaboration Campus and on-line classes.

Notes

- *This course requires college level readiness as measured by Accuplacer, ACT, or SAT scores; approved high school course work that is less than five years old; or successful completion of appropriate college-readiness course.
- As a graduate of a Career and Technical Education program you will be contacted by an ACC employee in approximately six months to verify your employment information. This information gathering is a federal requirement to ensure that ACC receives certain federal funding.
- In order to meet program requirements, students registered for ENG 121 or ENG 131 must also register for CCR 094 unless they can demonstrate otherwise meeting the CCR 094 standard through assessment testing, prior college coursework, or recent High School coursework. See an Advisor for details.
