

Setting up Your Profile

Set up your profile in the learning environment (optional). You can upload a profile image, share your social networks and personal info. Setting up a profile makes it visible to your classmates and the instructor in the Classlist. If there is anything that you do not like to share, do not include it while setting up your profile.

Step 1: Select the dropdown menu next to your name in the upper right corner of the page in D2L and select **Profile**.

The screenshot shows the top navigation bar of the D2L system. On the left, there is a home icon, the Arapahoe Community College logo, and the course title 'eLearning Course 5'. On the right, there are icons for a grid, email, chat, and a notification bell. Next to these is a user profile icon for 'David Barrentine'. A dropdown menu is open, listing several options: 'Profile' (highlighted with a red box), 'Notifications', 'Account Settings', 'Progress', and 'Log Out'. Below the navigation bar is a banner image of a mountain peak with the text 'eLearning Course 5' overlaid.

Step 2: An **Edit My User Profile** page appears where you can upload a profile picture and enter your **Social Network** and **Contact Information**. Select **Change Picture** to upload (or drag and drop) an existing picture from your computer.

The screenshot shows the 'Edit My User Profile' page for David Barrentine. At the top left, there is a profile picture placeholder with a 'Change Picture' button highlighted by a red box. To the right of the picture is a 'Nickname' text input field. Below the profile picture section is the 'Social Networks' section, which includes four input fields for Facebook, Google, Twitter, and LinkedIn. Each field has a corresponding URL example below it. At the bottom is the 'Contact Information' section, which includes an 'Internal Messaging Address' input field containing the email address 'David.barrentine@arapahoe.edu'.

Step 3: Scroll down to enter **Personal Info**. Add as much information that you would like to share and then select **Save and Close** to save your changes and exit.
