User Progress

The User Progress tool helps track student progress in a course by measuring their completion of nine different progress indicators. Instructors can also use User Progress to track their students' overall progress and prepare progress reports, while students can use User Progress to keep track of all of their course-specific assignments and feedback. Progress reports are available for the following progress indicators:

- Grades
- Objectives
- Content
- Discussions
- Dropbox Folders
- Quizzes
- Checklist
- Surveys
- Login History

Viewing User Progress

User Progress enables you to see many aspects of your involvement in the course: how often you have logged in, the files you have accessed, and the activities you have participated in.

Step 1: Go to your name dropdown in the upper right corner of the page and select Progress.
Step 2: A screen will open that will show the list of items available in the course and how you have participated in each. On the left of the screen is a Summary of all of the items.

Step 3: Selecting an individual item such as Discussions will allow you to see more detail about that specific level of activity.
**Step 4:** The last item in the list of possible activities is **Login History.** This allows you to view how frequently you have logged in, and how many days have passed since the last login.
