PROGRAM INFORMATION

A. PROGRAM DESCRIPTION AND OCCUPATIONAL INFORMATION

Graduates receiving an Associate in Applied Science, Associate Degree Nursing (ADN) are eligible to apply for licensure as a registered nurse (RN). The RN is educated as a generalist who delivers health care to clients and family groups and has competencies related to the art and science of nursing. The RN may be employed in a variety of acute, long-term and community-based health care settings. Registered Nurses function within the legal scope of practice and use professional standards of care when caring for clients and families across the life span. The degree provides the graduate with an educational foundation for articulation into the university setting.

B. ACCREDITATION

The Nursing Program is nationally accredited by the Accreditation Commission for Education in Nursing (ACEN), formerly the National League for Nursing Accrediting Commission (NLNAC). Contact information for ACEN is: 3390 Peachtree Road NE, Suite 1400 Atlanta Georgia 30326. The telephone number is 404.975.5000 and website is [Accreditation Commission for Education Nursing](http://www.nacsnursing.org)

The Nursing Program is approved by the Colorado State Board of Nursing (CSBON) located at 1560 Broadway, Suite 1350, Denver, CO 80202. The Board of Nursing's website is [State of Colorado Board of Nursing](http://www.csbon.org); the telephone number is 303.894.2430.

Arapahoe Community College (ACC) is accredited by The Higher Learning Commission. The Commission can be reached at 312.263.0456 or by accessing website hlcommission.org. The College operates under the jurisdiction of the Community Colleges of Colorado (CCCS). ACC students may transfer credits to state colleges and universities within Colorado. Transfer information is available in the Academic Advising Office, Room M2010.

C. COLLEGE INFORMATION

General information about Arapahoe Community College, including and not limited to academic calendar, hours of operation, student services, employee directory, crime statistics, catalogs, schedules, etc. can be accessed through the college's website at www.arapahoe.edu.

Professional Licensing Disclosure

Students enrolling or continuing at Arapahoe Community College (ACC) have a right to certain information that the college is required by law to provide. As a student applying for or attending the Associates Degree Nursing Program, you have the right to know it meets the licensure or certification for Colorado. It is possible that the degree/certificate may count toward licensing in states other than Colorado. If you are planning to seek professional licensure, it is strongly recommended that you contact the appropriate licensing entity in the state in which you are located or plan to locate in order to seek information and guidance regarding licensure or certification requirements before you begin this program. This program meets the applicable state prerequisites for licensure or certification in Colorado as listed below:

Colorado Board of Nursing

National Council State Board of Nursing NCLEX-RN and NCLEX-PN

ACC has not determined if the Associates Degree Nursing Program meets applicable state prerequisites for licensure or certification in states other than Colorado. Other states include (Alabama, Alaska, Arizona, Arkansas, California, Connecticut, District of Columbia, Delaware, Florida, Georgia, Hawaii, Idaho, Illinois, Indiana, Iowa, Kansas, Kentucky, Louisiana, Maine, Maryland, Michigan, Minnesota, Mississippi, Missouri, Montana, Nebraska, Nevada, New Hampshire, New Jersey, New Mexico, New York, North Dakota, Ohio, Oklahoma, Oregon, Pennsylvania, Rhode Island, South Carolina, South Dakota, Tennessee, Texas, Utah, Vermont, Virginia, Washington, West Virginia, Wisconsin, Wyoming and U.S. Territories: American Samoa, Guam, Northern Mariana Islands, Puerto Rico, and the U.S. Virgin Islands). For additional licensing requirements by state, see: <https://www.nursecompact.com/how-it-works/applying-for-licensure.page>

D. NON-DISCRIMINATION STATEMENT

Arapahoe Community College prohibits all forms of discrimination and harassment including those that violate federal and state law or the State Board for Community Colleges and Occupational Education Board Policies 3-120 or 4-120. The College does not discriminate on the basis of sex, gender, race, color, age, creed, national or ethnic origin, ancestry, physical or mental disability, veteran or military status, pregnancy status or related conditions, religion, genetic information, gender identity, gender expression, sexual orientation, sex characteristics, sex stereotypes, or any other protected class or category under applicable local, state, or federal law (as known as “civil rights laws”). Arapahoe Community College will take appropriate steps to ensure that the lack of English language skills will not be a barrier to admission and participation in vocational education programs.

E. TITLE IX: SEXUAL MISCONDUCT, DISCRIMINATION, HARASSMENT

Under Title IX of the Education Amendments of 1972, “No person in the United States shall, on the basis of sex, be excluded from participation in, be denied the benefits of, or be subjected to discrimination under any education program or activity receiving federal financial assistance.” In addition to protecting students, faculty, and staff from discrimination and harassment based upon sex, gender identity, and sexual orientation, Title IX of the Education Amendments of 1972 also prohibits any form of discrimination based upon pregnancy or related conditions.

The College has designated Angela Johnson, Human Resources Director, as its Affirmative Action Officer/Equal Opportunity Coordinator/Title IX Coordinator with the responsibility to coordinate its civil rights compliance activities and grievance procedures. For information, please contact Angela at 303.797.5715, email eoandtitleIXcoordinator@arapahoe.edu or Arapahoe Community College, 5900 S. Santa Fe Drive, Littleton, CO 80120.

You may also contact the Office for Civil Rights, U.S. Department of Education, Region VIII, Federal Building, 1244 North Speer Boulevard, Suite 310, Denver, CO 80204, telephone 303.844.3417.

FERPA: The Nursing program follows all Family Educational Rights and Privacy Act (FERPA) of 1974 guidelines as required by federal law and [ACC](#)

F. SCHOOL OF HEALTH and PUBLIC SERVICES

The Nursing Program is one of the health programs offered at ACC and is part of the School of Health and Public Services (HPS), ACC Instructional Division. The Dean of HPS is Pamela Thompson, MSN and the Provost and Vice President of Instruction is Cheryl Calhoun, PhD. The Dean’s office is located in the Annex Building, Room 2000 (A2000) and is open during usual business hours, Monday through Friday, 8:00 a.m. to 5:00 p.m.

G. ADVISORY COMMITTEE AND SHARED GOVERNANCE

The Advisory Committee for the Nursing Program is composed of a representative group composed of respected nursing administrators and staff from metropolitan health care institutions, faculty members, staff, alumni, and students. The purpose of the committee is to review curriculum, policies, and procedures, and make recommendations to the faculty/department regarding their appropriateness to the current practice of nursing. The committee also provides occupational information including trends in employment.

Student representation in the Nursing Program’s governance activities is achieved by student cohort volunteers. The Nursing Program committees have Nursing Program faculty and staff representation, and a volunteer student representative who has demonstrated leadership skills in their first semester of the program. Students attend faculty meetings and offer input to committee members about issues that impact student success and life within the program. Students are not present if confidential college or student information is being discussed. *According to FERPA, student information will only be discussed between faculty (school officials) if there is legitimate educational interest for student success. Names and student record information will not be released.*

H. FACULTY

The full-time ACC nursing faculty hold a minimum of a Master of Science in Nursing degree and have clinical experience in: Medical-Surgical, Pediatrics, Maternity, Psychiatric Nursing, or Nursing Education. For specific information about individual faculty, please see the [Arapahoe Community College Nursing Faculty](#).

I. NURSING PROGRAM MISSION

The mission of Arapahoe Community College, Department of Nursing is to advance professional nursing practice by delivering high quality, accessible education which prepares learners to meet complex health and wellness needs of diverse clients and communities.

J. PHILOSOPHY AND CORE VALUES

The philosophy of the nursing faculty is in harmony with and supports the mission of statement ACC. The philosophy of ACC's Nursing Department is based on the following core values:

Life-long Learning – Nursing practice is constantly evolving and information technologies are ever changing, the ability to adapt and grow professionally is essential.

Respect for Differences – Everyone is shaped and influenced by unique life experiences. Diversity enriches the environments in which we live, work, and learn.

Culture of Caring – Compassionate, culturally competent care better serves clients and communities and supports a holistic, patient-centered focus.

Integrity – Honesty, ethical practice, respect, and personal accountability in all interactions, personal, professional and academic.

Quality – Promoting a culture of inquiry and a mindset of continual quality improvement advances safe, evidence-based practice through the science of nursing.

Community – Fostering partnerships, teamwork and respectful communication with multiple disciplines as a collaborator and manager of care needs across the healthcare continuum.

K. ASSOCIATE DEGREE NURSING PROGRAM OUTCOMES

The Associate Degree Nursing Program Outcomes are as follows:

1. The annual licensure examination pass rate will be at least 80% for all first-time test-takers.
2. Eighty percent of graduates who respond to a graduate survey will indicate employment as an RN within nine to twelve months of graduation.
3. Eighty percent of students admitted into the AAS program and remain enrolled through the census/drop date complete the program within four consecutive semesters.

L. ASSOCIATE DEGREE NURSING END OF PROGRAM STUDENT LEARNING OUTCOMES

1. Provide safe, quality, evidence-based nursing care in a variety of healthcare settings to diverse client populations across the lifespan.
2. Engage in critical thinking and clinical reasoning to make client centered care decisions.
3. Implement quality measures to improve client care.
4. Participate in collaborative relationships with members of the interdisciplinary team, the client, and the client's support persons.
5. Use information management principles, techniques, and systems, and client care technology to communicate, manage knowledge, mitigate error, and support decision-making.
6. Provide leadership in a variety of healthcare settings for diverse client populations.
7. Assimilate professional, legal, and ethical guidelines in practice as a professional nurse.
8. Promote a culture of caring to provide holistic, compassionate, culturally competent care.

GENERAL INFORMATION

A. ADVISING

Academic advising and general college information is available at both ACC campuses and provide comprehensive services to assist new and current students to develop plans to complete nursing program prerequisites, understand policies and procedures, and access campus resources to facilitate student success. Please refer to the academic advising hours for each campus on [ACC Advising](#).

Pre-nursing and current nursing students may receive academic advising from the course faculty. The nursing program and the [ACC Tutoring and Learning Resources](#) also provide peer mentors and tutors for nursing students.

B. SEQUENCE OF COURSES

Nursing courses are sequential, and the successful completion of each course is a prerequisite for admission to the next level of courses.

C. ATTENDANCE GUIDELINES

A student admitted into a cohort are required to enroll in each nursing course at Arapahoe Community College. Students may take a nursing course at another college only with written permission of the Nursing Department Chair and completion of required transfer guidelines.

Students are required to be registered for a class to attend that class.

It is the responsibility of the student to complete the withdrawal process should they wish to discontinue a course of study or attendance at the college. Please consult your course faculty, syllabus/syllabi and the ACC College Catalog for specific information regarding procedures, financial aid implications or academic standing information.

Nursing classes prepare students for safe client care. Faculty expects students to attend each class, lab and clinical session to develop the theoretical and practical components of the professional nursing role. It is the responsibility of the student to notify the instructor prior to an absence or anticipated late arrival. Lab and clinical hours are often not possible to reschedule. When an absence results in the inability of the student to develop and demonstrate clinical practice objectives, or to meet the required hours of the course necessary for credit, the student cannot receive a passing grade.

In the event an absence is necessary, the following procedures will apply:

Theory/Didactic: Students are expected to attend all classes for which they are registered, except in cases of illness or other emergencies. Class attendance policies are explained in individual course syllabi. Announcements, valuable information, and handouts may be distributed during class. Students who miss class are responsible for obtaining this information and material. Students are required to complete graded and non-graded activities and assignments per the course syllabus.

Theory Attendance Policy:

Attendance is expected at all classes. A portion of the class grade may come from active participation. If emergency unforeseen circumstances require absence or tardiness contact the faculty member as soon as possible. Make-up opportunities, if available, are at the discretion of faculty.

Skills Lab: Lab instruction is conducted using multiple modalities including simulation. Lab attendance is mandatory. In the event of unforeseen circumstances, it is the student's responsibility to contact the course faculty to arrange appropriate make up. Arriving late, leaving early or being disruptive is unprofessional and unacceptable (see lab packet for further instruction).

Receiving a satisfactory performance in nursing skills lab is required. Failure to make up a missed lab may result in course failure. Students need to refer to each course syllabus for specific policies regarding missed lab time and grade penalties for absences. Excessive absences may result in an unsatisfactory grade and failure of the course.

Missed lab hours are subject to a fee-for-service and charged to the student by the college.

- The student will incur a fee-for-service of \$28.30 for each lab hour missed (Exceptions include: documented illness/injury, medical quarantine, and/or death in the immediate family). Documentation may be requested.

D. CLINICAL

Clinical Attendance

In courses with clinical, participation and attendance are mandatory. If a student misses clinical due to an *unexcused absence*, course failure may result. Unexcused absences include:

- Failure to notify faculty of an absence or tardiness (no call/no show).
- Missed clinical hours due to the failure of the student to prepare, failure to comply with dress code or reasonable suspicion to believe the student did not follow the Code of Conduct or established expectations.
- Failure to complete clinical make-up hours as defined by the faculty and syllabus policy.

Clinical Make-Up

In accordance with the Colorado State Board of Nursing (CSBN) guidelines, missed clinical hours must be made-up to attain 750 clinical hours upon completion of the nursing program and to ensure course outcomes. Clinical preparation time does not count toward the clinical hour requirement.

The make-up experience chosen is at the discretion of faculty and based on student needs, clinical site availability, and/or faculty/instructor availability. Make-up hours may include clinical experience, clinical simulation, or a combination of both. However, the total simulation hours for each course and the overall program cannot exceed more than 50% per the CSBN rules.

Missing more than 2 days of clinical during a course may constitute an incomplete and/or clinical failure based on the inability of the student to meet course outcomes. Simulation and make-up activities are at the discretion of the lead faculty for the course and not the student.

Missed clinical hours are subject to a fee-for-service and charged to the student by the college.

Any clinical absence in the nursing program:

- The student will incur a fee-for-service of \$28.30 for each clinical hour missed (The only exceptions are documented illness/injury, medical quarantine, and/or death in the immediate family). Documentation may be requested.
- The make-up experience will be planned by the course faculty lead. No more than 50% simulation may be utilized towards clinical hours in any one course or throughout the entire nursing program per CSBN.

E. COMMUNICATION AND CONFLICT RESOLUTION

There is an expectation of mutual respect and civility between faculty and students. The student is expected to follow chain of command steps for resolution of communication issues, including grades.

If an issue should arise, the student should schedule a meeting with the faculty member to discuss the issue. Quite often, issues can be resolved through direct communication between the faculty member and the student.

If the issue is not resolved by meeting with the faculty member, the student should meet with the Nursing Department Chair. If resolution is not achieved by meeting with the Nursing Department Chair students should meet with the Dean of Health and Public Services, and then the Vice President of Instruction if needed.

If a student feels a policy or procedure has been violated, their access to their education has been impacted, or a violation or inequitable action personally impacts them, students have an official means to present this issue. This process is the Student Complaint Procedure (SP4-31a). In addition, if the concern is discrimination or harassment based on federal or state civil rights laws or protected classes, a complaint may be filed under the

Civil Rights and Sexual Misconduct Resolution Process (SP 19-60). This process is available in the [ACC Student Handbook](#).

F. PROFESSIONAL APPEARANCE

Students will present themselves in a professional manner while enrolled in the Nursing Program. Students will comply with the professional dress code guidelines at all times to remain in the clinical setting. There may be exceptions for alternate styles of dress. A student may be dismissed from the program due to noncompliance with professional appearance. The dress code includes the following:

- Approved uniform attire can be found on acc.uniformstores.com. Uniforms will be worn in all lab and clinical settings unless the setting or agency requires other attire. The uniform will be neat, clean, wrinkle-free, and in good repair. The ACC embroidered logo is required on the left upper chest. Picture ID badges are to be worn at all times above the waist with the picture facing forward. Additional identification badges may be required by specific clinical agencies and may not be tampered with per facility policy.
- Appropriate undergarments should be worn.
- An approved uniform scrub jacket with the ACC embroidered logo may be worn over the scrub top; no sweaters, hoodies, hats, vests, or other jackets are allowed. A white or black tee-shirt may be worn, but the tee-shirt sleeves cannot extend or be visible beyond the uniform scrub top sleeves. Long sleeved white/black shirts may be worn under the uniform scrub top; sleeves should be able to be pulled up to allow for hand hygiene and aseptic techniques.
- Jewelry should be professional in appearance. No jewelry should be worn on cheek, eyelid, eyebrow, lips, tongue, or chin. Modest nose studs are permitted; nose rings/hoops are not allowed. Earrings can be worn in ears and cannot exceed two earrings per ear. Jewelry such as chains and necklaces should not come into contact with patients, the work area, or be such that it may cause a safety issue. Gauges in ears are required to be filled with skin-toned colored plugs. Accessories such as scarves, bandanas, buttons, and pins should not be worn unless approved by the clinical site.

Please note: Medical alert and wristwatches are not considered jewelry.

- Arm tattoos will be covered with long white or black sleeves; other visible body art may be requested to be covered depending upon facility discretion.
- Hair will be clean, well-groomed, and controlled so as not to compromise patient care. Beards, mustaches, and sideburns will be short, neat, well-trimmed, and follow the contours of the face for sanitary and safety purposes. Hair will be a natural color.
- Makeup should be appropriate for a professional setting.
- Gum chewing is not permissible when interacting with patients and in the lab setting.
- A watch with a second hand, a calculator, a pair of bandage scissors, a stethoscope with a bell and diaphragm, a black sharpie, and a pen with black ink are required.
- Students are expected to maintain appropriate personal hygiene, including oral care. Students will be free of offensive body odor, heavy scent of food, and/or tobacco. No cologne, after-shave, scented lotions and/or perfumes are permitted.
- Socks or hosiery are required. Shoes should be clean and in good condition. Good quality, comfortable, supporting, quiet, and professional shoes should be worn. The following shoes are not permitted: open toe, open heel, sandals, hiking boots, crocs, flip flops, cowboy boots, or shoes with a back strap. Soles should provide sure footing.
- Fingernails are to be kept clean and short. Artificial nails, gels, or overlays are not permitted in the lab or clinical setting for infection control purposes. Nail color, if worn, should be neutral in color. Nail art is not permitted.
- Maternity uniforms should be a similar style as the current student uniform.

- Personal electronic devices, including but not limited to, cell phones, wearable tech such as smart watches, headphones, and tablets/laptops are not permitted unless used as part of patient care. Students are required to follow the policies of the agency at all times.
- Clinical sites are not liable for any personal items, including electronic devices, that are lost, misplaced, stolen or damaged in the clinical setting.

G. INFORMATION TECHNOLOGY

Courses within the nursing program use online resources as a learning and communication tool between faculty and students. Students will need access to a computer and network connection.

Guidelines for use of mobile devices during classroom, lab and/or clinical:

- Mobile devices should be placed on airplane mode, silent or off during class, labs or clinical experiences.
- No photos may be taken by students in the patient care setting. Photos taken on the ACC campus should include only subjects who have given the approved ACC signed consent (i.e. photos for lab/simulation) or verbal consent for private photos. Photos of exams is strictly prohibited and considered to be a form of cheating. No personal phone calls or texting are allowed at any time while in a patient care area.
- Students are expected to have mobile devices turned off if required by clinical agency policy and may be expected to go to designated areas for cell phone use when accessing information on their mobile device.
- Facility iPads and/or other facility mobile devices are the preferred method for patient teaching. If a personal mobile device is needed, it should only be used for patient teaching purposes.
- Use of facility computers for personal use is prohibited.
- In accordance with HIPAA, confidentiality of client information is always protected.
- Students who violate client privacy by using mobile devices will be subject to HIPAA infraction consequences by the clinical agency.

H. SOCIAL NETWORKING

When contributing to social media, it is important to remember that it is visible to the public. Keep interactions professional and err on the conservative side. What may seem harmless to you may in fact identify the client or their family members and could be a violation of The Health Insurance Portability and Accountability Act of 1996 (HIPAA).

Remember your online presence reflects you as a professional. Be aware that your actions captured via images, posts or comments can reflect on you and many recruiters routinely search social networking venues when considering someone as a new hire. Students may not post names of patients or clinical partners in any social media interactions. Postings which may result in having an adverse impact on the program or college or violating client privacy rights may be subject to disciplinary action, up to and including dismissal from the program. The National Council for State Boards of Nursing (NCSBN) has provided guidance for nurses specific to social media use:

[A Nurse's Guide to the Use of Social Media](#)

PROGRESSION AND RETENTION

A. ASSESSMENT TESTING

The ACC Nursing Program has implemented HESI Assessment for testing in the nursing curriculum. This testing will give the program faculty and student an opportunity to identify areas of strength and weakness in learning and curriculum to better prepare the student to successfully pass the licensing examination.

Testing will evaluate critical thinking skills, content knowledge, and a comprehensive assessment of students' learning following designated courses and at the end of the first year and second year. For students not meeting benchmarks with each test please refer to your syllabus for details regarding remediation. Remediation is required to

be completed by a date established by the course faculty. Students may not be allowed to register for subsequent coursework until remediation has been satisfactorily completed.

B. PROGRESSION

In order to progress through the Nursing Program, a student is required to achieve a theory grade of “C” or better in each required nursing course; satisfactorily complete all on-campus labs and clinical hours; and maintain satisfactory clinical performance.

Failure of the theory, laboratory, or clinical component of a course constitutes failure in the course. Any course failure requires that all components of the course (theory, lab, and/or clinical) are repeated if and when the student re-takes the course. The student is required to be eligible to repeat the course according to the readmission policy.

Progression in the program may also halt if a clinical agency/facility requests that a student not return to their facility (to complete a current or future clinical). The nursing program has the right to terminate the clinical experience and record this as a student failure (F) in the associated theory course. This not only halts progression but may also result in disciplinary action, up to and including permanent dismissal from the program.

C. GRADING

Individual course syllabi/guides will identify grading parameters. An “Unsatisfactory” clinical performance evaluation means the student does not pass the nursing course regardless of the theory grade. Students are expected to speak directly with the theory faculty member(s) about any concerns, i.e., grading course materials, or suggestions for success. It is the student’s responsibility to contact the appropriate faculty member in a timely manner if an issue should arise. The following grading scale will be used throughout the nursing program for all NUR courses:

A = 90 – 100

B = 83 – 89

C = 77 – 82

D = 69 – 76

F = below 69

D. ACADEMIC SUCCESS PLAN

Students who do not achieve a passing grade on the first exam of any nursing course are strongly encouraged to complete an Academic Success Plan with the course faculty. The Academic Success Plan identifies student strengths and barriers to success and provides resources to promote future success. For subsequent exams, a student who falls below a 77% overall exam average will be encouraged to complete an Academic Success Plan. Students are encouraged to consult the course faculty and/or ACC Tutoring and Learning Resources for help in implementing the Success Plan. Request for reasonable accommodations are required to be initiated by the student through [Disability Access Services](#).

E. WITHDRAWAL

Students are encouraged to discuss their grade and class status with faculty before withdrawing from a course. Students are required to withdraw from the course themselves through approved college processes. If the current course grade is below a “C” at the time the student withdraws, that withdrawal will be considered as one program failure in terms of readmission. Students who withdraw from more than one NUR course in the same semester with both course grades below a “C” at the time of withdrawal, will be ineligible for re-admission. (Readmission may be considered if an extenuating circumstance was disclosed prior to withdraw and at the recommendation of the readmission committee).

Students are required to schedule and complete an exit interview with the Nursing Department Chair. The exit interview may include a member of the nursing faculty. The interview will address the issues that contributed to the student’s withdrawal from the program. Input from the student and faculty as well as any other relevant sources will be included.

The program retains the right to determine whether the conditions under which the student withdraws are

extenuating.

F. DEFERRAL

Students may choose to delay their own progression in the nursing program by deferring entry into a specific course and/or into their next successive semester. In order to defer, students are required to successfully complete all components of the course/courses in which they are currently enrolled. In cases of deferral, students are required to meet with the Department and/or Program Chair and follow exit interview guidelines. When students choose to defer, readmission guidelines will apply (e.g. may be dependent on availability of clinical placement). The program reserves the right to limit the number of times a student may defer.

G. CRITERIA FOR DISMISSAL FROM THE NURSING PROGRAM

The following circumstances are grounds for dismissal from the Nursing Program:

- Consumption of alcoholic beverages prior to or during laboratory, clinical experiences, voluntary Health Fairs (flu shot clinic, hearing and vision screening, etc.).
- Use of drugs, except under a doctor's written permission, prior to or during laboratory or clinical experiences.
- Diverting drugs in the clinical setting.
- Positive drug or alcohol test.
- Cheating, plagiarism, or any form of dishonesty.
- Verbally or physically abusive behavior toward patients, faculty, staff, or students.
- Unprofessional behavior in any setting.
- Unexcused absence.
- Disruptive/ disrespectful/uncivil behavior in the classroom that impairs the learning of others.
- Commission of a disqualifying offense after clear background check obtained.

Students are expected to adhere to the other rights, freedoms, and responsibilities outlined in the Student Code of Conduct, the Arapahoe Community College Student Handbook, and the current college catalog. Students who violate the Student Code of Conduct are subject to the disciplinary sanctions outlined in the Arapahoe Community College Disciplinary and Judicial Board Procedures.

H. GRADUATION REQUIREMENTS AND COLORADO STATE BOARD OF NURSING LICENSING

Registered Nurse: Students who successfully complete the requirements for an Associate of Applied Science degree in Nursing may apply to take the Registered Nursing Licensing Exam (NCLEX-RN).

Students need to do the following to be able to take the NCLEX-RN:

1. Apply for graduation with an Associate of Applied Science degree from ACC according to the information and **deadlines published in the college schedule and catalog**.
2. Request an official transcript sent from the ACC Records Department to the student (must include official date of successful completion following ACC graduation policies and procedures), to be provided by the student to the Colorado State Board of Nursing.
3. See the [Colorado Board of Nursing Website](#), for the complete application process, information and required forms.
4. Complete the application forms required by the State Board of Nursing and NCLEX and pay the required fees to take the NCLEX-RN exam.

All certificate and degree requirements must be confirmed by the college to ensure each student has met the requirements to graduate from the Registered Nursing Program. Every effort is made to expedite this process. However, the process can take 2-3 weeks following the last date of the final course in the program. The winter

break may delay this process for students completing the program in December.

READMISSION GUIDELINES

Students who defer progression, withdraw failing, or withdraw passing may be eligible to return to the program one time only on a space available basis.

Readmission is not guaranteed. Readmission decisions are made at the discretion of the Admissions/Readmissions Committee and the Nursing Department Chair to determine eligibility for readmission using the eligibility criteria listed below.

A. ELIGIBILITY FOR READMISSION

A student can only fail or withdraw fail from ONE nursing course in a semester and only one time. If a student fails more than one nursing course during the program, they will not be eligible to reapply for two years. A student cannot progress to the next semester until all courses within that semester have been successfully completed.

If a student has a lapse in nursing education greater than six months from the last clinical course completed to the next nursing clinical course attended, the student will attend a clinical skills fair this will be outlined in the Nursing Program Academic Success Plan.

Students are advised to maintain continuous nursing education to the best of their ability until readmitted into the program to maintain skills and nursing knowledge. This includes prerequisite and corequisite course work, BSN course work, or course work suggested by the Nursing Program Academic Success Plan.

Readmission placement should occur within one calendar year from the time the last nursing course was successfully completed. After one calendar year, the student will need to reapply to the nursing program.

B. PROCESS FOR READMISSION

1. Students requesting readmission to the Nursing Program will email the Nursing Department Chair. The email must include the student's current contact information including mailing and CCCS system email address, and telephone number.
2. All students who are eligible for readmission will be ranked by the following guidelines by the Readmission Committee and will be readmitted according to available space by their ranking.
 - a. Completion of prerequisites and corequisite course work
 - b. Agreement to and completion of a Nursing Program Academic Success Plan created with student and Nursing Department Chair.
3. If students are accepted for readmission, the student will be responsible for supplying all clinical compliance documentation including the possibility of obtaining an updated background check and drug screening.
4. Students will be notified of their status by email from the Nursing Department Chair to their student CCCS system email address, prior to the semester in which readmission is requested.
5. Students approved for readmission to the Nursing Program will be subject to the most current Nursing Program Student Handbook, located on the ACC website.

Students who are readmitted to the Nursing Program and are on an Academic Success Plan are asked to suspend any other schoolwork other than what directly pertains to AAS/ADN course work, this includes BSN courses and any co-requisite course work that isn't immediately required.

Students dismissed from the program because of disciplinary sanctions will be considered ineligible for readmission. (See Arapahoe Community College and Nursing Program Student Handbook, Student Code of Conduct: Responsibilities and Rights: AP 4-30a and CCCS System Presidents Procedures, Student Disciplinary Procedures, SP 4-30.)

C. TRANSFER GUIDELINES

Transfers from other colleges or universities will be evaluated on a case-by-case basis. Students may request transfer from another nursing program into the ACC Nursing Program on a space available basis. Transfer into the ACC Nursing Program is not guaranteed. All transfer requests will be reviewed by the Nursing Department Chair. Nursing courses transferred into the program cannot be more than one year old. Eligibility for transfer will be determined with input from the Admissions Committee using guidelines outlined in the readmission policy.

HEALTH AND SAFETY GUIDELINES

A. HEALTH DECLARATION

It is essential that nursing students be able to perform certain physical activities in the clinical portion of the program. At a minimum, students will be required to lift clients, stand for several hours at a time and perform bending activities. Students who have chronic illnesses or conditions must be maintained on current treatment; have documentation of this treatment and be able to implement direct client care with no restrictions. The clinical nursing experience also places students under considerable mental and emotional stress as they undertake responsibilities and duties impacting clients' lives. Students must be able to demonstrate rational and appropriate behavior under stressful conditions to remain in the program. Individuals should carefully consider the mental and physical demands of the program and profession.

B. HEALTH AND SAFETY REQUIREMENTS

1. All students entering nursing courses must meet all health and safety requirements to maintain enrollment status. Students meet these requirements by providing documentation upon admission and maintaining requirements throughout the program. Immunizations and screenings include the following:
 - a. Tetanus/Diphtheria/acellular Pertussis (Adacel/Adult Tdap) once as an adult, within the last 10 years.
 - b. MMR – two doses or titer
 - c. Hepatitis B vaccine series or titer
 - d. Varicella- two doses or titer
 - e. Seasonal Influenza Vaccine (annually)
 - f. COVID-19 vaccines (one dose of J&J or two doses of Pfizer, Moderna, or Novavax) and (1) COVID-19 booster
 - g. TB Skin Test-PPD test within the last 6 months is required and will be due annually. If positive PPD or BCG vaccine, a chest x-ray will be required within the past 5 years. A QuantiFERON blood test will also be accepted and is good for 5 years, if clinical site allows.
2. Students unwilling or unable to provide documentation of compliance with the health and safety requirements will not be permitted to attend nursing courses and will be asked to withdraw from the classes.
3. In circumstances of student illness, injury or other health limitation, and through an interactive process, the faculty and student will collaborate with Disability Access Services to determine if a student can return to the clinical experience and meet the essential functions of the program.
4. Students are required to provide proof of current health insurance coverage.

5. A completed criminal background check and evaluation for disqualifying offenses according to the [Colorado Community College System](#).
6. A completed HESI Nurse Entrance Test.
7. Fingerprinting through Colorado Bureau of Investigation (CBI) is required.
8. Current active Colorado Board of Nursing Certified Nurse Aide (CNA) card.
9. Health and safety requirements defined in the current Nursing Program Application at the time student is admitted.

In addition to the above, students will not be able to attend clinical unless they have:

1. A random drug screen, to be completed during the first semester of the Nursing Program.
2. A current American Heart Association CPR certification in Basic Life Support for Health Care providers is required.
3. Met the clinical facility requirements regarding Federal OSHA and HIPAA regulations, which include annual testing on the standards and achieving a score of 100%.
4. Completion of any facility requirements (i.e. computer or equipment orientation) by specified deadline.

For continuing students, the requirements cannot expire during an academic semester. Returning students must show compliance annually for PPD tests or biennially for CPR classes, within one month prior to starting class for entrance into class. For example, if one starts in August, CPR and PPD's are completed and documented by July. If one starts in January, PPD's and CPR classes are completed in December.

Facility, local, and state vaccination requirements must be met and are subject to change. Any medical or religious exemptions are solely at the discretion of the facility.

******Failure to complete these requirements will result in mandatory absence from clinical and may jeopardize the course grade. Health and safety requirements are subject to change without notice depending on clinical agency requirements. Failure to remain in clinical compliance will result in the inability to complete clinical and thus, impede any pathway to successful completion of the program.***

C. REASONABLE ACCOMMODATIONS

1. Students are expected to participate fully in activities required by the program and will be expected to meet all program objectives/expectations/requirements.
2. Students requesting accommodations should first meet with Disability Access Services located in Room M2710 or call 303.797.5860. It is recommended students set up their intake appointment with Disability Access Services prior to starting the Program. Specific information regarding the accommodation process can be accessed through [Disability Access Services](#).
3. Students having a temporary medical condition, including pregnancy and related conditions, that inhibits or restricts their activities should connect with Disability Services-. Documentation from the medical provider may be helpful, or in some cases required. Accommodations will be made if reasonable and possible.
4. Should a student become unable to participate fully in the program's activities and meet the essential functions of the program, the options for the student may include an incomplete or an administrative withdrawal. Once a student is able to return to the course, program or clinical assignment, medical provider clearance may be required. Specific questions or concerns regarding returning to a program or course, after medical-related extended absences or medical leave, should be directed to Disability Access Service staff, who will work with the Nursing Department Chair.
5. Reasonable accommodations afforded students in a classroom environment do not automatically transfer or apply to a clinical setting. If a student requests accommodations for the clinical setting, an additional review is conducted. This additional review includes determination of an appropriate, reasonable accommodation needed for the student to demonstrate technical standards in the clinical setting. The review includes considerations of both patient and student safety.

6. Once the faculty/instructor is in receipt of a letter provided by the Disability Access Service, accommodations are provided to the student. In most cases, accommodations are not retroactive.

D. ESSENTIAL SKILLS AND FUNCTIONAL ABILITIES FOR NURSING STUDENTS

Individuals enrolled in the ACC Nursing Program must be able to perform essential skills. If a student believes that he or she cannot meet one or more of the standards without accommodations, the Nursing Program must determine, on a case-by-case basis and in collaboration with Disability Access Services, whether reasonable accommodations can be made. A student is not required to disclose the nature of any disability to the Program.

Functional Ability	Standard	Examples of Required Activities
Motor Abilities	Physical abilities and mobility sufficient to execute gross motor skills, physical endurance, and strength, to provide patient care.	Mobility sufficient to carry out patient care procedures such as assisting with ambulation of clients, administering CPR, assisting with turning and lifting patients, providing care in confined spaces such as treatment room or operating suite.
Manual Dexterity	Demonstrate fine motor skills sufficient for providing safe nursing care.	Motor skills sufficient to handle small equipment such as insulin syringe and administer medications by all routes, perform tracheotomy suctioning, insert urinary catheter.
Perceptual/Sensory Ability	Sensory/perceptual ability to monitor and assess clients.	<ul style="list-style-type: none"> • Sensory abilities sufficient to hear alarms, auscultatory sounds, cries for help, etc. • Visual acuity to read calibrations on 1 cc syringe, assess color (cyanosis, pallor, etc.). • Tactile ability to feel pulses, temperature, palpate veins, etc. • Olfactory ability to detect smoke or noxious odor, etc.
Behavioral/Interpersonal/Emotional	<ul style="list-style-type: none"> • Ability to relate to colleagues, staff and patients with honesty, civility, integrity and in a nondiscriminatory manner. • Capacity for development of mature, sensitive and effective therapeutic relationships. • Interpersonal abilities sufficient for interaction with individuals, families and groups from various social, emotional, cultural and intellectual backgrounds. • Ability to work constructively in stressful and changing environments with the ability to modify behavior in response to constructive criticism. • Capacity to demonstrate ethical behavior, including adherence to the professional nursing code and student code of conduct. 	<ul style="list-style-type: none"> • Establish rapport with patients/clients and colleagues. • Work with teams and workgroups. • Emotional skills sufficient to remain calm in an emergency situation. • Behavioral skills sufficient to demonstrate the exercise of good judgment and prompt completion of all responsibilities attendant to the diagnosis and care of clients. • Adapt rapidly to environmental changes and multiple task demands. • Maintain behavioral decorum in stressful situations.
Safe environment for patients,	<ul style="list-style-type: none"> • Ability to accurately identify patients. • Ability to effectively communicate with other caregivers. • Ability to administer medications safely and accurately. • Ability to operate equipment safely in the clinical area. • Ability to recognize and minimize hazards that 	<ul style="list-style-type: none"> • Prioritizes tasks to ensure patient safety and standard of care. • Maintains adequate concentration and attention in patient care settings. • Seeks assistance when clinical situation requires a higher level or expertise/experience.

families and co-workers	<p>could increase healthcare associated infections.</p> <ul style="list-style-type: none"> • Ability to recognize and minimize accident hazards in the clinical setting including hazards that contribute to patient family and co-worker falls. 	<ul style="list-style-type: none"> • Responds to monitor alarms, emergency signals, call bell from patients, and orders in a rapid effective matter.
Communication	<ul style="list-style-type: none"> • Ability to communicate in English with accuracy, clarity and efficiency with patients, their families and other members of the health care team (including spoken and non-verbal communication, such as interpretation of facial expressions, affect and body language). • Required communication abilities, including speech, hearing, reading, writing, language skills and computer literacy. • Communicate professionally and civilly to the healthcare team including peers, instructors, and preceptors. 	<ul style="list-style-type: none"> • Gives verbal directions to or follows verbal directions from other members of the healthcare team and participates in health care team discussions of patient care. • Elicits and records information about health history, current health state and responses to treatment from patients or family members. • Conveys information to clients and others as necessary to teach, direct and counsel individuals in an accurate, effective and timely manner. • Establishes and maintain effective working relations with patients and co- workers. • Recognizes and reports critical patient information to other caregivers.
Cognitive/ Conceptual/ Quantitative Abilities	<ul style="list-style-type: none"> • Ability to read and understand written documents in English and solve problems involving measurement, calculation, reasoning, analysis and synthesis. • Ability to gather data, to develop a plan of action, establish priorities and monitor and evaluate treatment plans and modalities. • Ability to comprehend three-dimensional and spatial relationships. • Ability to react effectively in an emergency situation. 	<ul style="list-style-type: none"> • Calculates appropriate medication dosage given specific patient parameters. • Analyzes and synthesize data and develop an appropriate plan of care. • Collects data, prioritize needs and anticipate reactions. • Comprehend spatial relationships adequate to properly administer injections, start intravenous lines or assess wounds of varying depths. • Recognizes an emergency situation and responds effectively to safeguard the patient and other caregivers. • Transfers knowledge from one situation to another. • Accurately processes information on medication container, physicians' orders, and monitor and equipment calibrations, printed documents, flow sheets, graphic sheets, medication administration records, other medical records and policy procedural manuals.
Punctuality/ Work habits	<ul style="list-style-type: none"> • Ability to adhere to policies, procedures and requirements as described in the Nursing Student Handbook, ACC Student Handbook, college catalog and course syllabi. • Ability to complete classroom and clinical assignments and submit assignments at the required time. • Ability to adhere to classroom and clinical schedules. 	<ul style="list-style-type: none"> • Attends class and clinical assignments punctually. • Reads, understands and adheres to all policies related to classroom and clinical experiences. • Contact instructor in advance of any absence or late arrival. • Understand and complete classroom and clinical assignments by due date and time.

E. PREGNANCY

If a student is pregnant or has a pregnancy-related condition, the student may be granted accommodations through the interactive process and for as long as a medical provider deems them medically necessary. Nothing in these statements should be construed as a modification to the essential elements or functions of any academic program, course or clinical assignment.

- Students who are pregnant or have a pregnancy related condition, will be granted the same reasonable accommodations given to any other student with a temporary medical condition. Please see the Reasonable Accommodations section.
- Accommodations for pregnancy and related conditions may include, but are not limited to, allowance for makeup work, excused absences, extended deadlines, online learning options, and reasonable adjustments to a student's educational environment, even if they are outside of the instructor or faculty's typical practice, course syllabus or program handbook.
- Students are protected from any unwanted attention or reveal of a student's pregnancy status without their consent.
- When a pregnant student returns to school, ACC will take reasonable steps to ensure the student is returned to the same academic status as before the student's medical leave began to the extent possible.
- Breastfeeding students will be allowed reasonable time and space to express breast milk and in an appropriate location.

A student can seek accommodations from Disability Access Services, not through their instructor, faculty or clinical site/supervisor. Students who are pregnant or with related conditions are encouraged to seek assistance for accommodations as quickly as possible. ACC is limited in its ability to implement accommodations retroactively. Students seeking assistance during the semester of enrollment will have better options than those notifying ACC of their situation after the semester has ended.

If a student is concerned about harassment or discrimination on the basis of sex, please contact the Title IX Coordinator or Deputy Title IX Coordinator. Please see the 'Non-Discrimination Statement' section for their contact information.

F. INSURANCE – HEALTH AND INJURY

1. Students are expected to carry their own health insurance. Each student is solely responsible for all costs related to the purchase of health insurance and medical expenses associated with any personal illness or accident during or outside of school activities.
2. Students are responsible for their own transportation and vehicle insurance to and from clinical. No coverage is provided for any motorized vehicle not supervised or provided by the college.
3. Arapahoe Community College provides annual malpractice/liability insurance coverage for students enrolled in the Nursing Program as part of the registration fees, payable in the first and third semesters.
4. Students are covered by Workers' Compensation while in the clinical setting. In the event of an injury the student must do the following:

At Clinical Site:

1. Report incident to clinical instructor.
2. Follow through with agency requirements for on-site treatment and documentation. Provide a copy of agency documentation to ACC Human Resources. ***Follow-up care needs to be provided by ACC Workers' Compensation providers as listed below.***
3. Check client chart for history of Hepatitis B or any other communicable disease, if applicable.

In addition, at ACC:

1. Report to the Office of Human Resources, ACC Main Campus, Church Street Building, Room 1015, or call 303-797-5715 ***within 48 business hours*** of incident.

2. Bring copies of agency report and any billings related to treatment.
3. Complete Worker's Compensation form, available from the Office of Human Resources.
4. Arrange follow-up care through the ACC Office of Human Resources:
 - Human Resources will contact Concentra Medical Center to let hospital personnel know that you are on your way or to make an appointment for you and will provide you with a claim number.
 - Human resources will provide you with a list of Concentra Medical center sites. All work-related injuries are to be treated at any one of the 11 Concentra facilities (during regular business hours).
 - Upon treatment from Concentra, submit the necessary paperwork back to the Human Resources Office for further processing no later than 72 hours after the accident.
5. For emergencies that occur after hours, if possible, seek treatment at: HealthOne/Swedish Medical Center, 501 East Hampden Avenue, Englewood, CO 80110.

All Non-paid Cooperative Education Students Worker's Compensation: *Clinical Experiences are considered non-paid, cooperative education for Worker's Compensation purposes.*

Purpose: This is to notify you of a Worker's Compensation Program that Arapahoe Community College has implemented for non-paid Cooperative Education students. Arapahoe Community College's designated providers are Concentra Medical Center and Swedish Medical Center in Englewood for all medical care associated work-related injuries and illnesses.

The purpose is two-fold, to assure the employees/students access to quality medical care and, at the same time, to assure that the employees/students receive necessary and appropriate medical care. Arapahoe Community College feels this goal can be met by Concentra Medical Center and Swedish Medical Center in Englewood.

This program requires all non-paid cooperative education students incurring work-related injuries and illnesses to receive their medical care from Concentra Medical Center and HealthOne/Swedish Medical Center in Englewood. Medical care received from providers other than Concentra Medical Center and HealthOne/Swedish Medical Center will be considered "UNAUTHORIZED" and may not be reimbursed by the insurance company. Life-threatening emergencies are, of course, an exception to the rule. In those instances, the closest medical facility should be accessed. For information concerning Worker's compensation claims call Arapahoe Community College Human Resources Office: 303-797-5715.

G. SAFETY ADVISORY AND GUIDELINES

All nursing personnel and nursing students are professionally and ethically obligated to provide client care with compassion and respect for human dignity. Hence, they may not ethically refuse to care for clients solely because the client is at risk of contracting, or has an infectious disease such as HIV, AIDS, HBV, or COVID-19. All rules of confidentiality are followed when working with clients. The following information is provided to reduce risks to students that may occur in health care settings.

1. Radiation: Proper measures need to be taken when observing or working in areas of close proximity to radiation exposure.
 - a. Leave client and stand behind a lead wall.
 - b. Student is never required to hold or steady a client during radiation exposure.
 - c. If student chooses to hold a client, protective gloves, and apron covering reproductive organs must be worn.
 - d. Follow any other procedures expected/suggested by radiation department, i.e., wearing a monitoring device (film, badge, etc.).
 - e. Students who are under 18 or are pregnant are not to observe or participate in radiation procedures.
2. Standard Precautions for Exposure to Body Fluids: All blood and body fluids are considered potentially infectious and are treated as if known to be infectious for HIV, HBV and other blood-borne pathogens.

- a. Contaminated sharps shall not be bent, recapped or reopened. Shearing or breaking contaminated needles is prohibited.
- b. Contaminated sharps must be placed in appropriate container as soon as possible.
- c. Eating, drinking, smoking, applying cosmetics or lip balm and handling contact lenses are prohibited in the work area where there is a likelihood of occupational exposure. Mouth pipetting/suctioning of blood or other potentially infectious materials is prohibited.
- d. When exposure is possible, personal protective equipment shall be used, as follows:
- e. Gloves shall be worn when it can be reasonably anticipated that the individual may have hand contact with blood, mucous membranes, other potentially infectious materials, non-intact skin, when performing vascular access procedures and when touching contaminated items or surfaces.
- f. Masks, eye protection and face shields shall be worn whenever splashes, spray splatter or droplets of blood or other potentially infectious materials may be generated, and eye, nose or mouth contamination can be reasonably anticipated.
- g. Gowns, aprons and other protective clothing shall be worn in occupational exposure situations and will depend upon the task and the degree of exposure anticipated.
- h. Surgical caps or boots and shoe covers shall be worn in instances when gross contamination can be reasonably anticipated.
- i. Wash hands immediately after removal of gloves or other personal protective equipment.

3. Exposure Guidelines

- a. Students must wear appropriate protective clothing/equipment when performing any tasks that may involve exposure to body fluids or radiation.
- b. Any direct exposure to body fluids occurring while functioning as a nursing student must be reported immediately to the clinical instructor.
- c. Students exposed to body fluids shall follow hospital or clinical facility protocol.

H. SAFE PRACTICE RESPONSIBILITIES

Safe practice is described in the Nurse Practice Act. Students must practice with appropriate knowledge, skills and ability. To ensure compliance with the Nurse Practice Act, and to protect both the client and the student, the following ***guidelines for safe clinical practice*** have been established:

1. Only those activities discussed in class and/or practiced in lab may be performed. Remember, it is your responsibility to know your level of ability in performing each skill. Regardless of the number of times you have performed a skill, you must check with your instructor prior to performing the skill by yourself without supervision.
2. Supervision is required unless otherwise directed by the instructor. Interventions/interactions are limited to assigned clients unless directed otherwise by the instructor.
3. The student will prepare for client care including procedures by consulting appropriate references before attending clinical.
4. The student has the responsibility to consult with the instructor if there is any uncertainty regarding safe practice.

All policies and procedures established by the clinical site must be adhered to.

I. UNSAFE PRACTICE

Unsafe practice includes noncompliance with the guidelines for safe practice as described above. It also includes, but is not limited to, the failure to implement safe care as evidenced by lack of knowledge, use of poor judgment, omissions of procedures/treatments/medications, incivility, and commission of errors.

If the faculty has reasonable cause to believe a student is unable to practice with reasonable skill and client safety,

the student may be suspended from the clinical setting for the remainder of the day; such an action may result in academic consequences and/or disciplinary sanctions.

Incivility has been identified by the Joint Commission as a root cause impacting patient safety ([2008, 2021](#))([2016](#)).

- o According to Clark and Athen (2011), “uncivil behaviors exist along a continuum ranging from disruptive behaviors on one end, to threatening behaviors on the other. Incivility at the left end of the scale can be expressed by some fairly subtle behaviors such as eye-rolling, arm-crossing and walking away -- the kind of actions that nurses often excuse by saying "so and so is having a bad day."
- o Overt expressions of incivility, such as bullying, taunting, and intimidation are more apparent and most reported in media. However, this can begin in what appears to be a relatively benign manner, with behaviors such as sarcastic comments or dominating conversation in a group. It is essential to any organization to recognize the behaviors at the left end of the continuum, to name them, and ultimately address them to prevent more aggressive acts of anger or violence from occurring.

Clark, C. M., & Ahten, S. M. (2011b, March 24). The downward spiral: Incivility in nursing/Interviewer: Laura A. Stokowski. *Medscape Nursing*. Retrieved from <http://www.medscape.com/viewarticle/739328>

Infection Risk: It is unsafe to expose patients to infectious disease. Attendance at clinical sites with a diagnosis or symptoms is unacceptable. All facilities require some vaccination records; most require annual influenza vaccination or wearing of a mask at all times.

COVID-19: Beginning in March 2020, students were restricted from patient contact at varying levels, including mandatory compliance with quarantine protocols. As of September 2021, local, state, and federal mandates require COVID vaccine for all health care workers. Updates to requirements will be provided as data evolves.

- Without proof of required immunizations, you will be able to participate in lecture and lab coursework if you choose but will not be able to complete the required clinical rotations and will eventually be failed out of the program. You understand that you will be financially obligated for the courses.
 - Any student who does not meet clinical compliance standards that are required by clinical sites will not be able to be placed for the required Colorado State Board of Nursing 750 hours of clinical requirements. The student will be allowed to attend theory courses and labs, but due to facility clinical requirements outside of Arapahoe Community College, any student who does not meet the requirements for clinical compliance will be unable to meet the clinical requirements; thus, failing the coursework. If the student is unable to meet clinical compliance and chooses to attend theory and lab coursework, the student accepts financial responsibility for the associated costs knowing that program success will not be possible.

DRUG SCREEN PROCESS

A. DRUG SCREENING GUIDELINES

Initial enrollment in the ACC Nursing Program and subsequent placement at clinical sites is contingent upon presentation of a negative drug test. ACC will not accept a previous employment drug test. Some clinical agencies may require additional testing during the program. This may result in additional cost to the student. All students enrolling in the ACC Department of Nursing Program, in addition to other established entry criteria, must agree to present documentation of a current drug test. The drug test and/or any necessary transportation to a testing facility must be paid for at the student's expense. For drug testing, students must use the designated lab and testing date identified by the ACC Nursing Department. Students will be advised to prepay for a random drug screen through the CCCS contractor when offered admission. The drug screen is random and is administered any time between orientation to the nursing program and the first day of clinical rotation in the first semester. The ACC Student Services Department receives drug screen reports and notifies the Nursing Program if a student has passed or failed. The ACC Department of Nursing supports and enforces a zero (0) tolerance alcohol and drug policy. A student may request a retest (of the same sample) at the time notification of test failure is given. The student is fully responsible for the cost of this additional testing. If the results of the retest are

still positive, the student will be unable to enter the Nursing Program and tuition may be refunded in accordance with the College refund policy as stated in the catalog.

1. Students who fail the initial drug screen are disqualified from the Nursing Program. Students may reapply to the program the following semester. Students may seek assistance for substance abuse disorders through Student Services.
2. Only the person for whom a prescription drug is prescribed can bring the medication on ACC property or a clinical setting. The prescription drug must be in its original container. The student must use the prescription drug only in the manner, combination, and quantity prescribed. Under no circumstances may the students use medical or recreational marijuana. Suspicion based alcohol or drug testing will be performed if performance or behavior in the nursing program is suspected to be substance related.

B. "REASONABLE SUSPICION BASED" DRUG TESTING

This procedure refers to the use/misuse of, or being under the influence of alcoholic beverages, illegal drugs or drugs which impair judgment while on duty in any health care facility, school, institution or other work location as a representative of the Nursing Program. The Nursing Department may test students on a reasonable cause basis.

1. When a faculty/clinical instructor perceives the odor of alcohol or observes behaviors such as, but not limited to, slurred speech, unsteady gait or confusion and these behaviors cause the faculty or clinical instructor to suspect the student is impaired by alcohol or drugs, the following actions will be taken:
 - a. The instructor will remove the student from the client care or assigned work area and notify the course faculty and/or Department Chair. Depending on agency requirements, the instructor may need to immediately notify the clinical agency.
 - b. Drug screening will be required whether or not the student admits to drug or alcohol use.
 - c. The student will be required to pay all costs associated with the "Reasonable Suspicion Based" drug testing.
3. If the results of the test(s) are negative for drugs, alcohol, and other illegal substances or for non-prescribed legal substances, the student must meet with the Nursing Department Chair within 24 hours of the test results to discuss the circumstances surrounding the impaired behavior. Based on the information provided and further medical evaluation, if warranted, the Nursing Department Chair will make a decision regarding a return to the clinical setting.
4. If the results of the test(s) are positive for drugs, alcohol, and other illegal substances or for non-prescribed legal substances, the student will be suspended from the Nursing Program and administratively withdrawn from all nursing courses for two consecutive semesters.
5. If a student refuses "Reasonable Suspicion Based" drug testing:
 - a. The instructor will remove the student from the clinical setting pending a full investigation through established college procedures and system policies.
 - b. The instructor will arrange for transport from the clinical site. If the student refuses transportation, law enforcement will be contacted for assistance.
 - c. The student will not be allowed to participate in the Nursing Program until the investigation is completed.
6. A refusal to test will be considered a positive result and will be subject to appropriate disciplinary action up to and including possible dismissal from the nursing program.

C. READMISSION GUIDELINES RELATED TO SUBSTANCE USE DISORDER

Students who are administratively withdrawn from Nursing courses for reasons related to substance abuse will:

1. Submit a letter requesting readmission to the Nursing Program.
 - a. Include documentation from a therapist specializing in addiction indicating status of substance use, addiction, recovery and/or documented rehabilitation related to the substance use.

- b. Include documentation of compliance of a treatment program as identified by the therapist including a statement that the student will be able to function effectively and provide safe therapeutic care for clients in a clinical setting.
2. Repeat drug screening for alcohol/drug use immediately prior to readmission. Random and/or reasonable suspicion testing may be required after readmission.
3. If a student, after being readmitted to the Nursing Program, has positive results on a drug/alcohol screening, the student will be permanently dismissed from the Nursing Program and may be subject to college disciplinary sanctions.

GUIDELINES FOR STUDENT CONDUCT

A. STANDARDS OF PROFESSIONAL CONDUCT

The Nursing Faculty believe standards of professional conduct are an inherent part of professional identity, and expect students enrolled in the Nursing Program to adhere to these standards. Students practice within the boundaries of the Colorado State Board of Nursing policies, the ANA Code of Ethics for Nurses, the guidelines of the Arapahoe Community College Nursing Program and the policies and regulations of the healthcare agencies where they are assigned for clinical learning. In addition, students are subject to college authority and civil-criminal authority. Students enrolled in specialized programs, like the Nursing Program, are required to follow the standards specified in their respective program student handbook, the Arapahoe Community College Student Handbook, as well as local, state, and federal laws.

Standards of professional conduct are those behaviors, along with nursing discipline specific skills or knowledge, vital for successful completion of the Nursing Program. The expectation is that students will adhere to the Standards of Professional Conduct in all settings - the classroom, lab, clinical facilities, the college and the community when representing the Nursing Program.

Standards of Professional Conduct include:

- **Confidentiality:** Respects the privacy of clients and respects privileged information.
- **Communication:** Effectively uses various methods of communication to interact appropriately with various constituents.
- **Accountability:** Accepts responsibility and answers for one's actions and resulting outcomes; seeks out constructive feedback in order to improve skills and interpersonal interactions.
- **Dependability:** Displays reliability and is trustworthy.
- **Responsibility:** Fulfills commitments and executes duties associated with the nurse practitioner's role.
- **Active Learner:** Identifies sources of learning to improve and grow knowledge, skills and understanding.
- **Veracity:** Exhibits truthfulness; adheres to precision and honesty.
- **Critical Thinking and Problem Solving:** Recognizes and defines problems in a logical and thoughtful manner; develops fact-based solutions and effectively evaluates outcomes;
- **Respectfulness:** Treats others with consideration and courtesy; reads and adheres to agency policies and procedures.
- **Punctuality and Promptness:** Presents oneself on time and ready to begin at prescribed times for classroom and clinical assignments.
- **Professional Appearance:** Adheres to established dress code in all clinical and professional settings.
- **Ethical and Legal:** Adheres to the ANA Code of Ethics and operates within the standards of care established for the role of student nurse.
- **Safety:** Prevents or minimizes risks for physical, psychological or emotional jeopardy, injury or damage.

- **Civility:** Practice reflective, courteous, empathetic behaviors when interacting with classmates, instructors, college and clinical staff, clients and their families.

B. EXPECTATION IN REPORTING UNPROFESSIONAL CONDUCT

During the course of study in the Nursing Program, a student may observe behaviors in others that appear to violate standards of academic or professional integrity or actions that have a potential to harm another person. Each student has the responsibility to report any questionable activity or behavior to the faculty or Nursing Department Chair.

C. PROFESSIONAL BOUNDARIES

Students enrolled in the Nursing Program are expected to learn and understand the importance of establishing and maintaining professional boundaries. In a student role, professional boundaries exist between student and faculty and between student and client. Students unclear of proper behavior or of an appropriate response should consult the instructor for guidance.

1. Faculty and students will maintain a professional relationship:
 - a. Students should not expect an instructor to act as a personal counselor or therapist. Students may seek counseling referrals through the Dean of Students Office, located in the Student Engagement Center, M2720, 303.797.5730 or acc.dos@arapahoe.edu
 - b. Students should not ask or expect an instructor to join an individual, group or class in any social situations while the course is in progress.
 - c. Students should not offer an instructor gifts or money as gratitude for instruction. Instructors may accept cards or notes when students wish to thank an instructor.
2. Students will maintain a professional nurse-client relationship ([NCSBN Professional Boundaries](#)):
 - a. Professional Boundaries: Students providing nursing care should strive to inspire the confidence of the client. Students must treat all clients, as well as other health care providers, professionally. Clients should expect those providing nursing care to act in their best interests and respect their dignity. The student should never attempt to obtain personal gain at the client's expense and should refrain from inappropriate involvement in a client's personal relationships.
 - b. Boundary violations can result when there is confusion between the needs of the student and those of the client. These may be characterized by excessive personal disclosure by the student, secrecy or reversal of roles and may cause additional distress to the client
 - c. Students should not care for a family member, friend or acquaintance as it may be a conflict of interest.

D. HEALTH INSURANCE PORTABILITY AND ACCOUNTABILITY ACT (HIPAA)

All verbal, electronic and written information relating to clients and contracted clinical agencies is considered confidential and is not to be copied or discussed openly. Information may be disclosed only as defined in HIPAA guidelines for educational purposes. A breach of confidentiality may result in disciplinary action, up to and including dismissal from the course, program or college.

E. DISCIPLINARY PROCEDURES

The relationship between nurse and client is based on a high degree of trust. Students entering nursing have a particular obligation, therefore, to conduct themselves in a manner that reflects honesty, integrity, and respect for others.

Students in the Nursing Program should display the qualities of honesty and integrity, and each student should apply these principles to his or her academic and subsequent professional career. Students are expected to achieve a level of maturity that is reflected by appropriate conduct at all times.

When a nursing student is alleged to have violated any of the requirements or guidelines outlined in the Nursing Student Handbook or in the ACC Student Code of Conduct, the college will adhere to the student disciplinary procedure. All students should review the [ACC Student Handbook](#), *Student Rights and Responsibilities: Student*

Code of Conduct, AP 4-30a; *Student Disciplinary Procedure*, SP 4-30; *Student Grievance Procedure*, SP 4-31; *Civil Rights Grievance and Investigation Process for Students*, SP 4-31a; and *Sexual Misconduct Procedure*, SP 4-120a.

Any nursing student found to be in violation of requirements or guidelines outlined in the Nursing Student Handbook or the ACC Student Handbook, including academic misconduct or Student Code of Conduct, may be subject to discipline up to and including program dismissal and expulsion from the college.

F. ACADEMIC MISCONDUCT

Students should adhere to the highest standards of academic honesty and integrity. Examples of behavior that violate these standards include but are not limited to: plagiarism, cheating, illegitimate possession and/or use of examinations and falsification of official records. See *Student Rights and Responsibilities: Student Code of Conduct*, AP 4-30a for a detailed explanation of academic misconduct

Students Will Affirm the Following Statement Regarding Academic Misconduct:

“In submitting this exam and/or assignment, I hereby affirm this is my work alone and I have neither received nor given assistance to another student on this exam and/or assignment. I understand all evaluation materials are secure and no questions in whole or in part were copied, photographed, or transmitted to any other person.”

Artificial Intelligence (AI) and Academic Integrity

The Nursing Program at Arapahoe Community College recognizes the increasing presence of Artificial Intelligence (AI) tools in our academic setting. AI refers to computer systems or software that can perform tasks typically requiring human intelligence, such as learning, problem-solving, and language processing. The goal is to promote academic integrity, ensure fairness, and support effective learning. We would like to provide students with the following guidelines on the use of AI specific to our health sciences academic programs.

First and foremost, we are a nursing program, and our practice is built on research and evidence-based practice. Patient outcomes depend on our ethical practice, and we take this responsibility seriously. We are invested in creating students who have critical thinking skills, clinical reasoning abilities, and prioritize patient safety. As faculty, our goal is to guide students in the use of new AI models while also asking that students create their own work and vet everything for accuracy. Faculty are dedicated to creating assignments that ask for personal experiences and reflections and allow the student to generate their own insights and analysis of a topic. Being able to find and apply quality nursing research is a key component of our program. This AI usage policy aims to foster a fair and effective learning environment for all students. By adhering to these guidelines, students can ensure their success in the nursing program, the NCLEX examination, and future workplace.

Acceptable uses of AI

- Generating ideas, research, or creating an outline for a research paper. (AI use must be disclosed and cited in the correct APA format). Assignments must reflect student understanding of the topic. Ideas generated by AI must be critically evaluated and expanded on by the student, adding authentic thoughts, ideas, and insights. Students must be able to demonstrate their understanding independently.
- Utilizing AI-powered flashcards, quizzes, and other study aids to reinforce learning, while verifying the accuracy of the content.
- Using products like Grammarly to help with spelling, grammar, punctuation, and language proficiency.
- Accessing citation generators to help with references, but students must always double-check sources and provide DOI links for faculty.
- Using AI for an in-class activity with the faculty's permission.
- Using AI to explain complex concepts and provide additional examples

Unacceptable Uses of AI

- Using AI to complete assignments without disclosure, or submitting AI-generated work as one's own, is considered academic dishonesty. This includes using AI for essays, research papers, discussion boards, creative writing, SIM homework, or analytical responses without proper citations.
- Any "cut and paste" use of AI where the student asks a question and then cuts and pastes the answer for the assignment.
- Using AI tools when the instructor has forbidden it. Students should always consult with their instructor if they are unsure about the appropriate use of AI tools.
- Any use of AI that is uncited or undisclosed to the instructor is considered plagiarism.
- Relying on AI to complete assignments or projects without understanding the material bypasses learning. This includes using AI to write essays or solve problems without personal effort.

AI Detection

- The nursing program often uses AI and plagiarism software for key assignments in nursing courses. This includes products such as Turnitin, Office 365 AI detector, and others. In addition, faculty review student work carefully, noting any inconsistencies in writing style, unusual vocabulary, or content that seems beyond the student's demonstrated ability.
- When unacceptable AI use or plagiarism is detected, the student will be notified immediately and an in-person or Zoom conference will be scheduled.
- If AI use is suspected, faculty may require students to reproduce the content in person. This may involve writing a similar essay, explaining their thought process, or demonstrating their knowledge through an oral examination.
- If AI use is confirmed, the student has used cut-and-paste features, and/or plagiarism or inadequate citation is present, the student will receive a zero on the assignment. In addition, the nursing program will follow the college-wide Student Behavioral Expectations and Responsibilities Resolution Procedure (SP4-30a) which may result in an additional grade reduction, course failure, or disciplinary action. Cases will be reported to the Dean of Students Office.

Student Responsibilities

- Understand the policy: Familiarize themselves with this AI usage policy and adhere to its guidelines.
- Develop Skills Independently: Use AI tools to supplement learning, not replace it. Emphasize critical thinking and personal effort.
- Maintain Integrity: Ensure that all submitted work is their own and properly attribute any AI assistance.
- Report Misuse: Report any observed misuse of AI tools to the appropriate authorities.

G. NURSING STUDENT CONDUCT AND DEMEANOR

In-seat and online/hybrid format theory/didactic and lab classes will be conducted at ACC's Littleton Campus. Clinical learning will occur at various clinical sites in the Denver Metropolitan area. It is expected that students will conduct themselves in accordance with the expectations set forth in the Nursing Student Handbook and the ACC Student Handbook.

Nursing students shall not commit or omit any act which constitutes a violation of any law, rules, regulations, procedure or directives of the nursing department, its staff or faculty.

In the classroom and at the clinical site students shall not use insulting, threatening, profane or uncomplimentary language which defames or demeans in any way to include the age, race, sex, religion, ethnic origin, or nationality of any individual, organization or group including staff, faculty, hospital staff, other students or the program.

H. CLINICAL MISCONDUCT

A student may be dismissed from a clinical site for violating the guidelines in the Nursing Student Handbook or the

ACC Student Code of Conduct. Some examples of such behavior include, but are not limited to:

- Intentionally or recklessly causing physical harm to any person at a clinical site.
- Performing unsafe practices or acting outside the scope of a student nurse.
- Appearing under the influence of alcohol or drugs.
- Failure to meet uniform requirements.
- Failure to call and to attend a scheduled clinical rotation.
- Two tardy arrivals or one incident of leaving early from a clinical assignment for any reason without permission of the clinical instructor.
- Failure to maintain client or facility confidentiality, privacy and safety.
- Failure to communicate pertinent client information to staff/instructor.
- Any behavior that may adversely impact future use of clinical site.

I. STUDENT DUE PROCESS

In cases of alleged student misconduct, faculty will report the matter to the Nursing Department Chair and if deemed necessary after faculty/Department Chair/Dean meeting; subsequently to the Dean of Students Office. Students will be provided with notice from the Dean of Students Office and an opportunity to be heard regarding the alleged misconduct. Those found in violation of the Student Code of Conduct or Nursing Student Handbook guidelines and requirements may be subject to disciplinary sanctions up to and including program dismissal and college expulsion. Students should review the Disciplinary Procedures found in the [ACC Student Handbook](#) for more detailed information.

CLASSROOM, LABS AND CLINICAL INFORMATION

Faculty believe the student will derive the greatest benefit from class if they prepare by completing the activities identified by faculty prior to attending class. Assigned reading, critical thinking exercises, computer programs, videos, etc. enhance learning and are expected to be completed prior to class.

Students are expected to come prepared for class and to maintain professional behavior in the classroom. Arriving late, leaving early, or being disruptive is unprofessional and unacceptable.

A. WRITTEN ASSIGNMENTS

Directions, explanations, and guidance regarding the preparation and evaluation of written assignments will be discussed in each course. Written papers will be expected to follow the professional standards of a formal college paper using the APA format.

All deadlines for written assignments must be met unless the course instructor has granted an extension. Extension of the published deadlines may be granted by the instructor due to hardship emergencies only. To be granted an extension, contact the instructor prior to the deadline. Failure to meet this deadline may result in points deducted for each day late. Please see instructions in each course syllabus for specific grade penalties for paperwork turned in late.

B. EXAMINATIONS

1. Students are expected to take all exams as scheduled and should contact the faculty on or before the day of the exam when they are unable to take the exam at the scheduled date/time (unless an emergency exists) and arrange a date to take an alternate exam in the college testing center.
 - a. Students must take an alternate exam in the testing center by the date and time designated by the faculty. If the student does not take the alternate exam by the date/time designated by the faculty, the student will receive a grade of zero on that exam.

- b. Grade penalties will be utilized when exams are not taken at the scheduled time; the grade penalties are defined in each course syllabus, typically a reduction of the exam grade by 2 points if the first exam is not taken at the scheduled date/time; and a reduction of the exam grade by 10 points if the second exam is not taken at the scheduled date/time. If the third exam is not taken at the scheduled date/time, the result is a reduction of the exam grade by 25 points.
2. Refer to course syllabi for further exam policies.
3. Students must notify faculty prior to scheduled exam if they are unable to take said exam. Failure to notify faculty may result in a zero on the exam.
4. If a student is so late to an examination that other students have left the area, an alternate test will be scheduled. Alternate examinations may be given in the Instructional Testing Center during regular Testing Center hours.
5. Unscheduled quizzes may be part of the course grade. See individual course syllabi for policies related to unscheduled quizzes.

Exams are administered online through the learning management system (D2L) or through an online portal (ExamSoft). If calculators are allowed during testing, they will only include arithmetic functions and will be provided by the faculty or within the testing portal.

Standardized online end-of-course examinations will be administered in each semester using the HESI portal. The number of examinations administered per semester will vary and instructions for registering will be provided by the faculty. Test results are available to students upon completion of the examination. Calculators are available through the website.

Instruments that store information are not allowed at any exams. Hand-held (personal data assisted) computers may not be used. Electronic devices including cell phones, dictionaries, headphones, or any other printed materials are not allowed during testing. Exceptions can be made for open book tests designed to assess student use of appropriate references rather than attempted memorization of critical information.

Students are expected to initiate interactions with the course faculty regarding their academic standing. Any student not achieving a grade of C or greater on an exam is encouraged to make an appointment with the theory faculty as soon after the review of the examination as possible or before the next scheduled examination. The theory faculty may refer the student to tutoring and learning resources. Tutoring is available for students who are having difficulties.

The ACC Nursing Program requires participation in all assessment testing examinations for all students. Students are made aware of assessment tests required each semester by the course faculty.

C. RECORDING DEVICE AND LAPTOPS

Nursing Program faculty may give permission for students to record classroom/lab sessions based on the following policy. Classroom and lab materials are the property of the faculty and Arapahoe Community College and are protected by federal copyright. These materials may not be published or quoted without the express consent of the faculty and without giving proper identification and credit to the faculty. Students who wish to record classroom/lab sessions may do so with faculty permission. These recordings may be used only by the student for the purpose of enhancing their individual study (understanding) of the material presented in class. Students are allowed to use laptop computers in the classroom or academic purposes only (i.e. taking notes, downloading resources or files).

D. ON-CAMPUS LABS

Students should prepare for lab by reading the objectives for lab experience, and by completing any additional assigned reading and/or viewing of audio-visuals related to specific skills prior to the lab experience. Students who come to lab and are not prepared will be asked to leave.

Lab activities will consist of viewing demonstration of technical skills, discussing the skill and clarifying questions. Students will be expected to practice each skill a minimum of three times during the lab class as well as on their own time as needed to gain proficiency in each skill. Students will participate in group discussion to problem solve and adapt procedures to various client situations.

All students must demonstrate selected psychomotor/technical skills satisfactorily to the instructor in the lab before

these skills are performed in the clinical setting. Testing proficiency of lab skills will be done for selected procedures with satisfactory performance determined by the nursing instructor. Failure to do so will prevent the student from attending clinical and from continuing in the course (see lab packet for further instructions).

Students are responsible for helping keep the lab in order and for returning equipment to appropriate storage areas when the lab is completed.

E. CLINICAL ROTATIONS

Students are guests in the clinical facilities and must abide by agency policies and procedures. If for any reason the agency representative asks a student to leave the facility or does not invite a student back, the student may fail the course or be dismissed from the program, depending on the offense and previous incidents.

Assignments

Faculty in collaboration with the Clinical Coordinator will assign students to their clinical rotations. Students are prohibited from contacting Unit Managers or any clinical facility personnel to change or request clinical assignments. Student assignments may include day, evening, and weekend assignments as well as 8, 10 and 12 hour shifts. Changes in clinical assignments will likely not be possible and will only be considered with a reasonable accommodation documented from Disability Access Services. ACC is limited in ability to provide retroactive accommodations due to limited clinical space. Student learning will be considered in the assignment of clinical rotations. However, living near a certain clinical facility is generally not a consideration for clinical assignments. Student clinical assignments may change at any time and for any reason including individual student learning needs, administrative reasons, or clinical facility availability. Students are responsible for providing their own transportation to the clinical facility.

Student data including, but not limited to, full name, last four digits of social security number, date of birth, address and CCCS email address, and telephone may be required by the clinical facilities in order to facilitate access to client data records. Dates documenting immunizations for Rubella, Rubeola, mumps, Hepatitis B and Varicella; current Tetanus, seasonal influenza, COVID19, PPD/TB and CPR are also provided to the clinical facility, per facility requirements. Every effort will be made to maintain and assure student privacy through the myClinical Exchange (mCE) platform, per the facility requirements.

Preparation

Success in the clinical setting depends a great deal on the student's preparation for client care. Students are expected to be thoroughly prepared to care for their clients. Preparation needs to occur prior to the beginning of each assigned shift.

Prior to actual experience, each student is responsible for researching pertinent information regarding the individual clients they are assigned and practicing anticipated procedures in the learning lab. Students will initiate data collection at the clinical site. Please see individual course *"Nursing Program Guidelines and Expectations for Clinical."*

The student must be well groomed and have a professional appearance. If the student is not sufficiently prepared, or appears unprofessional, the student *will be sent home, resulting in a clinical absence*. Failure to be prepared may result in delivering unsafe care and may jeopardize the physical well-being of the client. Jeopardizing the physical or emotional well-being of the client may constitute a clinical failure.

Clinical Site Responsibilities

- a. Arrive on the unit at least 15 minutes prior to the beginning of the shift. Receive report and make initial assessment of the client. Provide care at the appropriate educational level. Be prepared to participate in nursing care planning conferences and to communicate changing client needs and/or pertinent facts, observations and nursing care given to your reference nurse and complete your charting.
- b. Client confidentiality must be respected at all times. No portion of the client record may leave the facility. This includes but is not limited to any type of client printout, summary, or lab report. Obliterating or cutting off identifying information is not adequate. All client information gathered by students should respect this confidentiality. Student papers must not contain client identifiers, i.e.

names or initials, etc.

- c. Any violation of HIPAA regulations may result in a clinical failure.
- d. Each student must become familiar with policies and procedures of the institution, which are available in each nursing unit.
- e. Students are responsible for informing the instructors of individual learning needs if these are not met through given assignments.
- f. When post conference is scheduled, students are responsible for being on time and participating in the planned activities.
- g. Students are expected to provide safe client care in the clinical setting.

Medication Administration Guidelines

Students are expected to function at the level of education and experience according to each semester competencies. Students are accountable to demonstrate competencies of previously learned content. All students must review the clinical agency's medication policies prior to administering medications in the unit.

- All students must follow the principles of safe medication administration.
- All students must follow the clinical agencies' policies and procedures for medication administration.
- All students must demonstrate competency in calculating medications prior to administering the medication. Students unable to calculate accurate doses may receive a clinical warning or unsatisfactory rating related to unsafe clinical practice.
- All students must report all medication errors to the instructor immediately.
- All medications given to infants and children must be approved by the instructor.
- The instructor reserves the right to limit a student's medication administration experience.
- Administer all medications (including oxygen) ONLY under the direct supervision (within arm's length) of the clinical instructor or nurse.
- Students must check two client identifiers (name and birth date), allergies, and look up all pertinent information on the medication before administering medication.

List of Procedures Students CANNOT Perform in Clinical

- Witness any consent forms.
- Perform any task that requires certification or advanced "instruction" (i.e., arterial blood gas (ABG) puncture, chemotherapy, remove PICC lines, telemetry).
- Take physician orders, verbal or phone. Transcribe chart orders.
- Initiate invasive monitoring, regulate epidural analgesia, independently monitor client following conscious/moderate sedation.
- Witness or sign out controlled substances in any medication delivery system.
- End of shift-controlled substance count, if applicable. Have narcotic keys in their possession, if applicable.
- Verify blood administration and/or witness blood administration forms.
- Perform any invasive procedure on each other (i.e., injections, catheterization, IV starts) in any setting.
- Any skill/procedure not covered in a nursing lab.
- Any task outside RN scope of practice as identified by facility.

- Any task not allowed by students as identified by facility.

Clinical Expectations

Students should be mentally and physically prepared to provide client care safely for each clinical; being sufficiently prepared includes obtaining client information AND completing all necessary written prep work prior to each clinical day.

- Submit all written clinical prep work at beginning of scheduled shift and all other assignments on time.
- Be responsible for TOTAL client care for each one of your clients (VS, assessment, bath/hygiene, medication administration, nursing interventions).
- Perform only those skills that have been checked off to perform in the school's nursing lab. Perform all skills under the supervision of a clinical instructor or RN, unless otherwise directed by clinical instructor. *Do not perform any procedures listed in the Nursing Program Student Handbook as prohibited.*
- Document each client's VS, physical assessment, nursing interventions on a designated form or computer record and report all information to assigned RN.
- Report all abnormal observations/changes in client's status to RN and clinical instructor.
- Suspend judgment and do not engage in gossip. Keep all information about clients and staff confidential and do not repeat or discuss what is shared with anyone outside of the group.
- Participate in post-conference; balance verbal comments so a level of appropriate participation is achieved.
- Be active and responsible for learning. Take an active role and be responsible for seeking out new learning opportunities.
- Maintain a positive attitude, be responsible, take accountability for your actions, work together as a team and develop focus on developing professionally.
- Treat everyone including clients, staff, peers, and clinical instructor with respect, dignity, and professionalism.

Additional Clinical Expectations for NUR 2011: Psychiatric/Mental Health Nursing

- Perform only those skills have been checked off in the school's nursing lab.
- Report safety issues **immediately** on the part of clients to charge nurse and clinical instructor (i.e. suicidal ideation, checking medications, medication side and adverse effects, etc.)
- Talk with clients out in the open areas, **NOT** in their rooms or behind closed doors.
- Do not administer, but be knowledgeable of, all medications along with major side effects, drug interactions the client is taking.
- Report all abnormal observations/changes in client's status to RN and my clinical instructor. Be aware of safety protocols.
- Follow HIPAA guidelines and protect clients' identity and privacy. Do not answer a client's telephone. Do not remove any portion of a client record from the hospital and do not include any client identifiers in your paperwork.

F. SMOKING AND TOBACCO USE

Since none of the clinical sites allow smoking and many do not allow even the smell of smoke on one's person while working in the facility, the ACC Nursing Program has established a "NO SMOKING" policy (this also includes vaping). No smoking is allowed either in the clinical facility, preceding or during a clinical shift. If there is any detectable odor of smoke on a person or their clothing, the student will be released from clinical and incur an unexcused absence. Smoking is not allowed on the ACC Campus ([Tobacco and Smoke Free](#)

NURSING PROGRAM STUDENT HANDBOOK AGREEMENT

I have received, read, and understand the policies and statements contained in this Nursing Program Student Handbook including the Professional Licensing Disclosure. I understand while I am enrolled in the Nursing Program, I will be subject to the current Nursing Program Student and ACC Student Handbook, which I can access online through the ACC website or request a hard copy from the appropriate offices. I do elect to abide by these policies in pursuit of my goal to become a graduate nurse.

I understand violations of standards, regulations, or code of conduct may result in disciplinary sanctions up to and including expulsion and/or program dismissal.

I am aware this Nursing Program Student Handbook does not cover every policy. I will avail myself of the ACC Catalog, Student Handbook and other publications. I indicate my willingness to adhere to these policies and statements by my signature.

APPENDIX

American Nurses Association (ANA) Code of Ethics

Provision 1

The nurse practices with compassion and respect for the inherent dignity, worth, and unique attributes of every person.

Provision 2

The nurse's primary commitment is to the recipient(s) of nursing care, whether an individual, family, group, community, or population.

Provision 3

The nurse establishes a trusting relationship and advocates for the rights, health, and safety of recipient(s) of nursing care.

Provision 4

Nurses have authority over nursing practice and are responsible and accountable for their practice consistent with their obligations to promote health, prevent illness, and provide optimal care.

Provision 5

The nurse has moral duties to self as a person of inherent dignity and worth including an expectation of a safe place to work that foster flourishing, authenticity of self at work, and self-respect through integrity and professional competence.

Provision 6

Nurses, through individual and collective effort, establish, maintain, and improve the ethical environment of the work setting that affects nursing care and the well-being of nurses.

Provision 7

Nurses advance the profession through multiple approaches to knowledge development, professional standards, and the generation of policies for nursing, health, and social concerns.

Provision 8

Nurses build collaborative relationships and networks with nurses, other healthcare and non-healthcare disciplines, and the public to achieve greater ends.

Provision 9

Nurses and their professional organizations work to enact and resource practices, policies, and legislation to promote social justice, eliminate health inequities, and facilitate human flourishing.

Provision 10

Nursing, through organizations and associations, participates in the global nursing and health community to promote human and environmental health, well-being, and flourishing.

American Nurses Association – Nursing Scope and Standards of Practice

Defines the boundaries of nursing practice and outlines expected competencies. The scope of practice addresses the fundamental aspects of nursing, including who, what, when, where, how, and why of nursing practice. The standards provide a framework of specific behaviors and actions that all registered nurses are expected to perform proficiently, regardless of their role, specialization, or setting. This document serves to ensure that nurses provide safe, competent, and comprehensive care. It guides nurses in their practice, provides a framework for evaluating their performance, and helps to ensure patient safety.

American Nurses Association. (2021). Nursing: Scope and standards of practice (4th ed.). American Nurses Association

ACC Nursing Program – (Nightingale) Honor Code

(based on Nightingale principles/Pledge)

“We, the incoming Arapahoe Community College Associate Degree Nursing class, come together, joined as a community of learners, to pledge our commitment to the highest standards of the nursing profession. We pledge our commitment to work together and to support each other to excel. We commit ourselves to ethical behavior, to honesty, integrity, accountability, and professionalism in all areas of our learning. As future professional RN's, we affirm our responsibility to work hard and to gain the required nursing knowledge, while always upholding the ethics of the nursing profession. We pledge to treat peers, faculty, staff and clients with dignity and to respect their values and beliefs. We pledge honesty in all interactions, and we commit ourselves to continue our nursing education, always adhering to these principles so that we may best care for our clients and our communities and be living role models of excellence in nursing.”

As we begin our studies in the Arapahoe Community College Nursing Program, we begin to be responsible for the integrity and the ethics of the profession of nursing. We are responsible for upholding the School of Nursing's Nightingale Honor Code, which is the visible marker of the honor and the ethics required of professional nurses. Our responsibility goes well beyond passively knowing the code. We are responsible for living the code. Being an honorable nursing student, and growing towards being a professional nurse, means being an active guardian of the integrity of the school and what it stands for. ANY dishonorable act undermines the honor of all of us and therefore will not be tolerated. The first and most critical element of the School's honor code is to be honest. The community of learners and teachers that make up the Arapahoe Community College Nursing Program demand students act as nurses, and be honest in all of their academic work. The Nightingale Honor Code is based on:

1. The integrity of one's word
2. Displaying intellectual and academic honesty
3. Respecting and considering others and their property

We will be asked in a Nightingale Honor Code ceremony to affirm our willingness to be bound by the Code. Each of us entering professional nursing will answer a roll call and pledge our intent to the Arapahoe Community College Nursing Program Nightingale Honor Pledge as a sign of commitment to guarding the honor code, and to guarding the profession of nursing. This pledge will serve as a symbol of our commitment to the “Peak of Excellence” of the Arapahoe Community College Nursing Program until we graduate and take the NIGHTINGALE PLEDGE at our Pinning Ceremony.
